

Menard County
Trails &
Greenways

Vision

Enriched lives through a network of land and water trails that connect people to natural and cultural resources and encourages exploration and conservation.

Mission

Promote the development and use of a network of land and water trails that connect people to natural and cultural resources, encourage recreation, and advance the conservation of the county's unique natural and cultural resources for the benefit of all.

FY22

Highlights

Petersburg Harvest Fest

Historic Wayside Park Celebration

Adopt-a-Highway

Earth Day Celebration

Pollinator Seed Giveaway

Elkhart Blue Ash Project

Menard County Forest Fund

Trails & Greenways Partnership with Broadgauge

Seeks to enhance the quality of life and natural beauty of our community and improve the environment in Menard County by planting native trees and preserving and restoring native forests.

New Salem Habitat Restoration Project

Appendix A
New Salem Restoration
Project Map

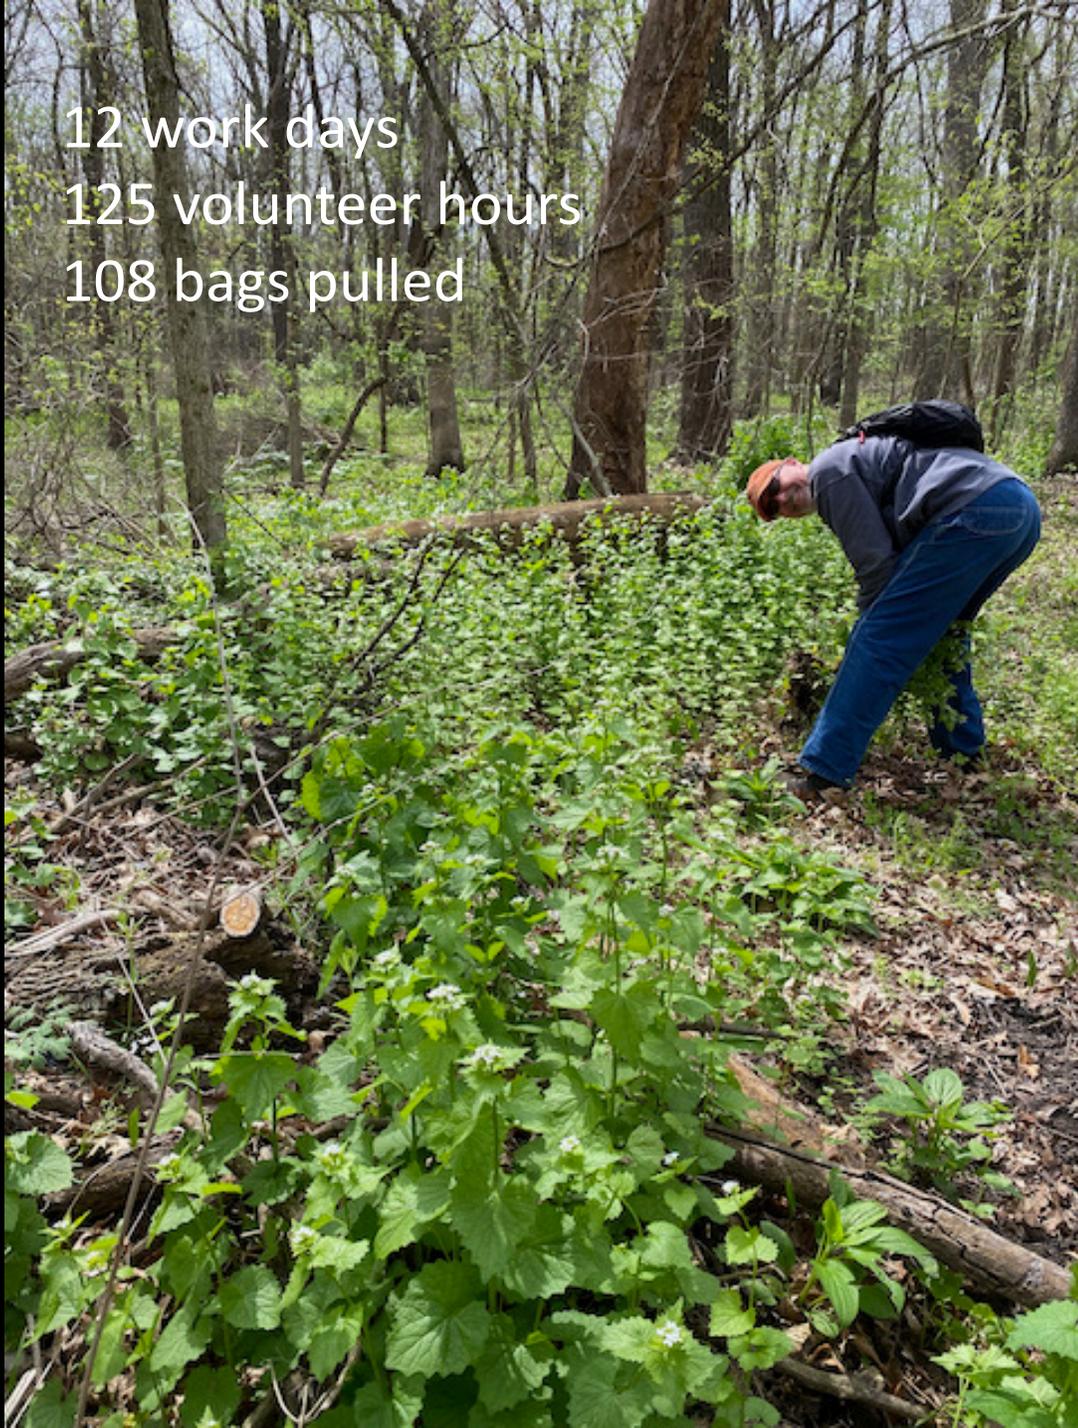

- Approx 65 acres having restoration potential
- Characterized by many mature oak and hickory trees
- Characteristics indicate historically this woodland had a very open understory
- Regeneration of oak/hickory is being suppressed by dense understory vegetation
- Non-native invasive understory plants are primarily responsible for this suppression.
- Our focus has been getting rid of bush honeysuckle and garlic mustard

Walt's Memorial Restoration Project

12 work days
125 volunteer hours
108 bags pulled

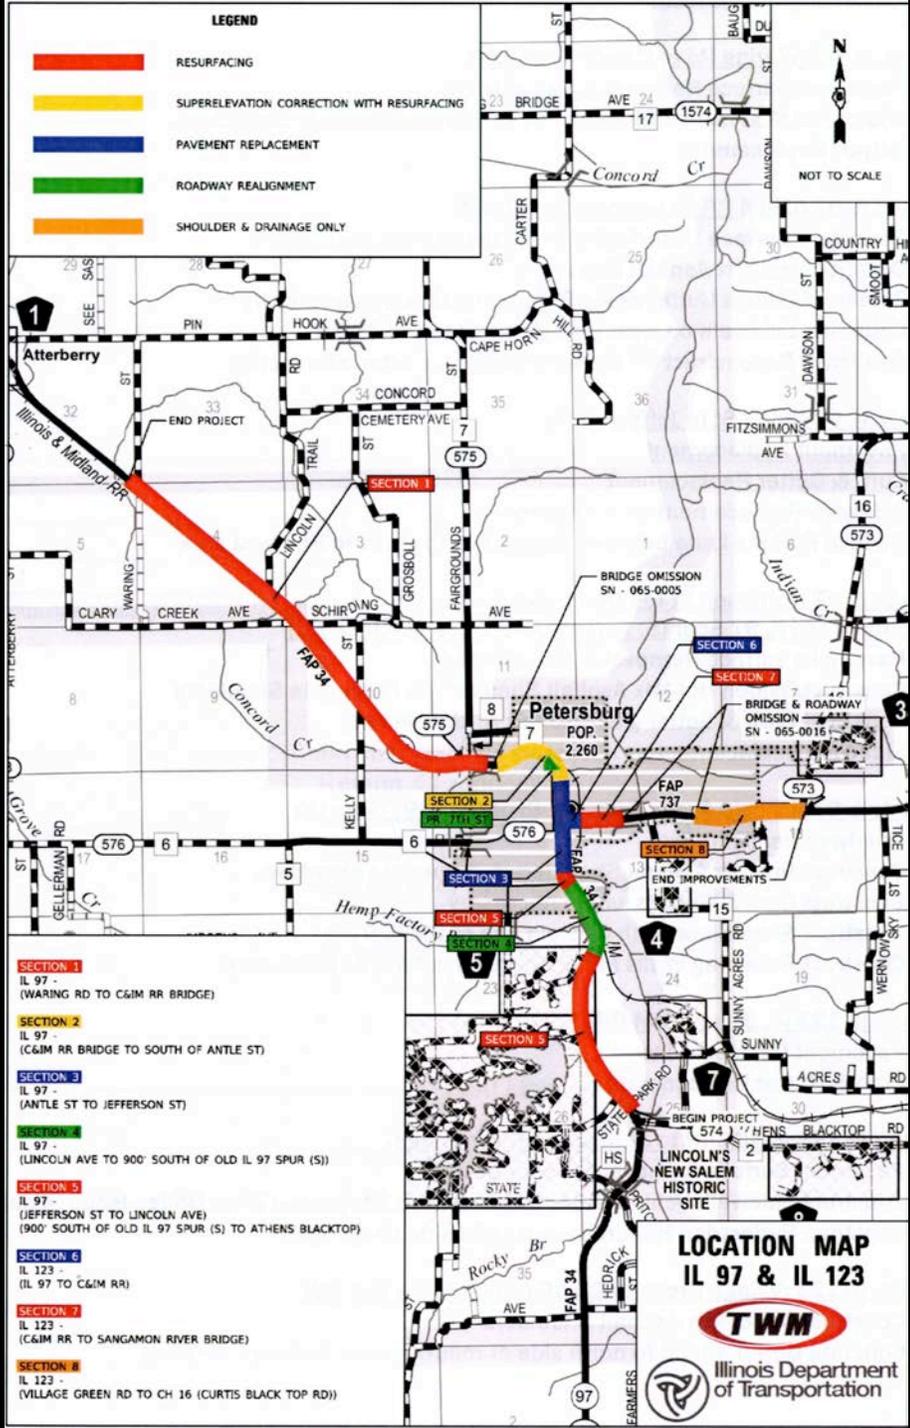

VOLUNTEERS The Heart of the Project

**Approx 40 volunteers
300 hundred volunteer hours**

Advocacy

A thick, light gray curved line starts from the bottom center and curves upwards and to the right, ending near the top right corner of the frame. The background is a solid dark gray.
